GRP

SIDE HINGED DOOR

www.garador.co.uk

Our new composite **GRP** side hinged doors are **lightweight, impact-resistant, and low-maintenance**. Built with **glass fibre reinforced gel coat and resin** they won't rot, rust, or corrode. A **UV-stable finish** protects against the elements, needing only an occasional rinse to stay pristine.

What is Composite GRP?

GRP doors feature a glass-fibre reinforced construction with a fully encapsulated chassis for strength and durability. The smooth white Flo-coated interior and timber-effect finish offer a clean, low-maintenance look.

Styles:

Maintenance

Painting:

No painting required;
colour embedded in.

Sealing:

Sealed surface resistant
to moisture and weather.

Repair:

Minimal repairs; resistant
to warping and rot.

Weather Resistance:

Withstands harsh
weather conditions.

Illustration purposes only

Door stays and dampeners as standard

A door stay at the top of the door, helps to keep the door open and stops it blowing shut, if there are heavy winds. Gas pistons are employed as dampeners for a gentle closing motion.
